RENEWED PETITION TO MAKE SPECIAL  
PURSUANT TO 37 C.F.R. 1.102  
(MPEP 708.02 PETITION TO MAKE SPECIAL)

Mail Stop PETITION  
Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

This is a response to the 28 June 2005 Decision On  
Petition to Make Special dismissing Applicant's Petition to  
Make Special submitted on 25 February 2005. A shortened  
statutory period for response was set for 2 months, up to  
and including 28 August 2005. In response to the 28 June  
2005 Decision On Petition to Make Special dismissing  
Applicant's Petition to Make Special submitted on 25  
February 2005, this is a Renewed Petition to Make Special  
which is believed to satisfy the requirements as set forth  
in MPEP § 708.02 VII.

Serial Number: 10/809,015  
Art Unit: 3629

All claims presently pending in this case are directed to a single invention. Nevertheless, Applicant is willing to elect without traverse should a restriction or election be required.

No pre-examination search was conducted by Applicant. However, the present case is a continuation application of United States Application SN 10/263,321, which is now issued United States Patent No. 6,739,506 (the '506 patent). The prior art of record in conjunction with the '506 patent are Kanter (U.S. Patent No. 5,537,314), Burton et al. (U.S. Patent No. 5,025,372), Selgas et al. (U.S. Patent No. 6,571,290), and Shurling et al. (U.S. Patent No. 6,009,415), copies of which are enclosed.

In the only independent claim now pending in this case, namely, independent claim 21, Applicant claims a method including the steps of 1) providing an authorized user of a credit card issued by a service provider; 2) the authorized user incurring debt on the credit card; and 3) for a predetermined amount of debt incurred by the authorized user on the credit card, the service provider submitting an entry into a sweepstakes on behalf of the authorized user. In the third full paragraph of page 3 of

Serial Number: 10/809,015  
Art Unit: 3629

the Notice of Allowability issued of the '506 patent file history, a copy of which is enclosed herewith, the Examiner states that "Shurling, Selgas, and Burton, taken alone or in combination thereof, fails to teach the steps of the authorized user incurring debt on the credit card; and for a predetermined amount of debt incurred by the authorized user on the credit card, the service provider submitting an entry into a sweepstakes on behalf of the authorized user." This statement made the Examiner, of which Applicant and his undersigned Attorneys are in full agreement with, clearly shows how the claimed subject matter in the only independent claim now pending in this case, namely, independent claim 21, is patentable over Shurling, Selgas, and Burton, which are referenced that are deemed most closely related to the subject matter encompassed by the claims now pending in this case.

Kanter is not deemed most closely related to the subject matter encompassed by the claims now pending in the present application. Nevertheless, Kanter teaches a computer assisted system for a multilevel incentive program that acts as an advertising campaign for a sponsoring company; and, moreover, a referral recognition system for an incentive award program. However, nowhere does Kanter

Serial Number: 10/809,015  
Art Unit: 3629

teach or suggest, either alone or in combination with one or more of Shurling, Selgas, and Burton, a method that includes "the authorized user incurring debt on the credit card; and for a predetermined amount of debt incurred by the authorized user on the credit card, the service provider submitting an entry into a sweepstakes on behalf of the authorized user." Accordingly, the subject matter set forth in independent claim 21 of the present application is clearly patentable over Kanter.

It has been recently discovered 1) that there is an infringing method presently in use, 2) that a rigid comparison of the method with the claims of the above-referenced application has been made, 3) that the undersigned attorneys for Applicant are of the opinion that at least independent claim 21 of the present application is currently and unquestionably infringed, and 4) that Applicant and Applicant's undersigned attorneys have a good knowledge of the pertinent prior art. It is therefore respectfully requested that the above-identified patent application be made special because of actual infringement. In support of this petition enclosed a check for the \$130.00 fee as prescribed by 37 C.F.R. § 1.17(h) has been previously submitted.

Serial Number: 10/809,015  
Art Unit: 3629

In view of the foregoing, it is believed that this Renewed Petition to Make Special satisfies the requirements set forth in MPEP § 708.02 VII and should be granted.

Date: 8/11/2005

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Michael W. Goltry', written over a horizontal line.

## DETAILED ACTION

### *Amendment*

1. Acknowledgement is made of Amendment filed 26 September 2003.

### *Allowable Subject Matter*

2. Claims 1-2, 4-12, 14-18 and 20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to specifically teach a method including steps of: providing an authorized user of a credit card issued by a service provider; the authorized user referring a first customer to the service provider for credit card services; the first customer submitting an application for credit card services to the service provider; the service provider receiving, processing and approving the application and issuing a credit card to the first customer establishing a first referred authorized user of a credit card; and in consideration therefore to the authorized user the service provider issuing valuable consideration to the authorized user; the authorized user incurring debt on the credit card; and for a predetermined amount of debt incurred by the authorized user on the credit card, the service provider submitting an entry into a sweepstakes on behalf of the authorized user.

Shurling teaches a method comprising steps of: providing an authorized user of a credit card issued by a service provider; the authorized user referring a first/new customer to the service provider for credit card services; the first/new customer submitting/enrolling an application for credit card services to the service provider; the service provider receiving, processing and approving the application and issuing a credit card to the first customer establishing a first referred authorized user of a credit card; and in consideration therefore to the

Art Unit: 2876

authorized user the service provider issuing valuable consideration (i.e., Incentive Rewards) to the authorized user for every predetermined number of referred authorized users of credit cards.

Selgas teaches the step of the user enters registration information about the user and Referral Information if available, which serves as the first customer designating the authorized user as a referring party.

Burton teaches an incentive award program, which serves as the valuable consideration, comprises a monetary payment, wherein the monetary payment is also considered as a gift.

However, Shurling, Selgas and Burton, taken alone or in combination thereof, fails to teach the steps of the authorized user incurring debt on the credit card; and for a predetermined amount of debt incurred by the authorized user on the credit card, the service provider submitting an entry into a sweepstakes on behalf of the authorized user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
